

Hey guys,

PPE

Please wear proper PPE especially when intubating or being involved in resuscitation. We are centralizing resources from outside sources and Lewellyn from KCH supply is bringing PPE to my front office. I will leave this door open for anyone to come in. Right now there are gowns and masks. My suggestion would be to use this as backup and still get PPE from the clinical area. Drs. Ozaki and Mehta have supplies in their office too. If there are issues getting PPE call me in real time.

Admitted Patients

I am happy to see everyone in the ED looking after our patients even when admitted. The medicine and MICU teams are overwhelmed and it's a team effort. KCH has two dedicated medicine teams rounding and UHB will have a team too.

Oxygen

Obviously this has been a huge resource. At Kings County PCAs are now supposed to be assessing O2 tank needs. If we need oxygen or any other resource please call the command center immediately- 718-245-8989. I have posted the number in the clinical areas.
