

Notable things:

DOH testing is TWO swabs, in addition to the RVP swab. Both swabs go in same viral medium. Quest testing is ONE swab. Please do all swabbing at once to minimize exposure risk. Refer to emails about proper PPE for testing.

Notice that the tube is different; it is important to send the correct tube to the correct place, otherwise it gets discarded.

You MUST have a DOH case number for DOH testing, otherwise the sample may get discarded.

Please email Randi/Ninfa/Cindy/Pia with all cases you test. We are tracking all cases so we don't lose anyone that is positive.
