

Stemi cases:

We are accepting stemi cases for cath. If the attending says to give lytics please escalate to Dr Marmor or us immediately. There will be cases they will choose to give lytics too but they don't want FDNY not bringing us these cases.

Non covid cases:

we are still seeing and admitting these patients. If you have an issue let us know.

Symptomatic Employees:

If you are seeing an employee with symptoms please test them. We have faster testing capabilities and are doing in house testing now.

Suite C food:

The suite C conference room will be locked up. We will put all food in there for the staff. The junior resident will have the key and can give it to you when you are ready to take a break.

Family member updates:

If possible at the time of disposition please try to call the number in the chart to let a family member know the patient's status. We know many times the phone number is wrong. If you indicate that in your note the patient relations team knows to try to reach out via other ways to get a number that is accurate.

We are giving admitted family members the option to email videos or messages to familyoutreach@downstate.edu. When you call them can you please share this website with them if they wish to send a video to a patient. We will check these messages daily and route to the correct inpatient teams so that they can share with patients that are admitted.

Foldable stools:

We have placed foldable stools for the standing computers so everyone can sit. Please fold them up if not in use so others can pass by the area. We will try to get hooks mounted on the wall to hang them up in the next few days.

PPE in the hallway:

Please don't wear the PPE out in the hallways. There are hooks on the ambulance ramp to hang things if you want.

Figs scrubs should be in this week....we will let you know as soon as they arrive.
